
Subject: [Plug-in] SSGM2.02 Veteran BETA 2.0
Posted by [reborn](#) on Fri, 08 May 2009 21:11:24 GMT
[View Forum Message](#) <> [Reply to Message](#)

I did not add all the features that I had planned, mainly the distribution of points. But the source code is lying there in the points distribution system for anyone to pick-up and add themselves. It might make a nice project for some trying to learn, I dunno...

There is also allot of commented code in there that only needs a little tweaking. I really hope someone finishes this off.

I would of finished it all off, but the decision was based on time constraints and to be honest, getting bored of the veteran system itself.

It's still a really massive improvement on the last version though, and very configurable... Infact there was not allot that didn't make it really.

Quote:

This is a plug-in designed to work with SSGM2.02 for cnc_renegade.

It was written by reborn from MP-Gaming.COM (fm_reborn@hotmail.com).

This is a second release version and probably has some bugs in it, with feed-back I will address these issues.

This plug-in is based on the system first created by black-cell. However, it has been developed to be configurable for server owners so that they might

set it up in a unique way for there own server.

There is allot of infomation in the veteran.ini and veter2.ini that will help you understand the configuration.

I don't run a renegade server, I have no real use for this plug-in and have made it for the sole reason to help other server owners.

If you use this plug-in and modify it, if you see a problem, either tell me, or preferably submit code. Don't be selfish, release the source code.

I believe it is only with this attitude that Renegade will continue to keep it's diminishing player base.

I really mean it, this thing took me quite a while to write, and if you're reading this, then I did it for you. So if you modify the source code or add your own code, then release it.

To use this plug-in, refer to SSGM.ini in your SSGM2.02 server folder.

You'll need to add the .dll to the server folder, and make an entry in the [Plugins] section, mine looks like this:

```
[Plugins]
01=veteran
```

You'll also need to add veteran.ini and veteran2.ini supplied to your SERVERs directory. This is where you can configure all the settings for the veteran system.

Any cinematic files you make for the !ability command will need to go in the servers data folder.

I urge you visit my forums and my site @ MP-Gaming.COM. I would also like to direct you to Black-Cell.NET. There is a history of this game there that most people are oblivious to, and without Black-Cell, none of the feature rich servers we have today would be here. They also have a renegade server back up and running. Be sure to find it in the WOL server listings and join. It's hella fun.

ini files..

.....
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
.....
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
```

; These settings determine which preset has a veteran value and depending on the list you add it to, what that value is (they can have a value of 1,2,3,4,5 or 6). All the
; presets listed in VetWorth1 have a veteran value of 1.
; This system has been set up so that you can assign which preset you want to have a veteran value (only works for presets that are buildings, characters, buildings, c4 or beacons)
; The added advantage of this system (which to be honest I think is quite clever) is that you can add or remove presets. Meaning if you made a server side mod that changes the
; flamethrower character to the secret chef character, you could still have the chef give veteran points by looking up his preset name and adding it to one of the lists below.
; It also means you could remove all of the entries I made here, and replace them with presets from a standalone mod, such as APB or Reborn.
; In theory, if the server is capable of running SSGM, then you could make this system work for any mod past, preset or future.
; Obviously you can add entries to any of these lists, but remember to increase the number by one prefixing the entry first.
; If you place the same preset name in more then one list, then it's veteran value will default to the list with the most veteran value. But doing this is not recommended.
; Only place presets in here you actually want to have a veteran worth. If this is being used for APB for example, then remove all the renegade presets.

Yeah, just a typo, but that does need to be fixed in order for the server to read it.

I came across more. A lot of them you copied and pasted, but you didn't change the numbers for a lot of the code for different levels. So a lot of them are using level 1 settings.

I post it as BETA because I can only test to a certain extent, and almost always certainly expect there to be a few errors.

Posting it as BETA also allows for changes further down the line in the way it is written if people have suggestions on coding practices, rather than just feature creeps. It detaches me from blame if something goes wrong, as it is simply a BETA with no real promises, other than I try to test it as much as I can, but I would rather spend the time writing code and let other people find any issues. You generally need a large player base to test it properly anyway...
None of them will ever come out of BETA, it's just convenient.

They have 5 stars because I vote 5 stars on them. Personally I think they are more worthy of it than a skin of a glowing ramjet or cornea damaging water texture.

true, but glowing ramjet or cornea damaging water texture get effects on all maps, all modes, all PCs, your codes working only for WOL high servers and stuff...once again I will repeat that, and don't remove my message... why you didn't make stuff/codes/scripts for new C&C Reborn game modes? all stuff I saw you made is something about base defences components and tiberium silos, c'mon!

Oh wow. So these plugins reborn releases change the way you, as a player, play these games on servers that choose to run these plugins.

You and your great skins might only affect, let's say, 30 people, while a plugin like this on a map could affect a lot more players and has more value in my eyes towards gameplay than some random skin.

So you're not sure if this was a cause of the vet system, and you're not sure even if it was a direct cause, exactly what triggered it?
Go find out.

Prulez wrote on Tue, 12 May 2009 10:37Niko "The Lay" wrote on Tue, 12 May 2009 08:58i just want all new scripts and stuff inside next reborn's release, why he wasted his time with these ones (since its already exist in all servers and stuff)
I don't believe it was released as a SSGM plugin, with source included.

I think he is referring to cnc_reborn when he says reborn's next release. But he obviously isn't aware that reborn's FDS was released, and is based on SSGM. So it too takes these plug-in's, well, most of them, as does APB.
Just ignore him, he is trying to derail the topic and get on my nerves, he isn't worth the time explaining anything to.

Again crashed:

[12.05.2009-19:45:09] <SKServ> [Vehicle Kill]: snowman (Stealth Tank) destroyed a Medium Tank (Driver: DJDiaper - Owner: DJDiaper - LD: 12.00).
[12.05.2009-19:45:10] <SKServBot> !ppage digitaaal This server require Core Patch 2 because later we planning add more maps! Type !cp2 in F2 (Public Chat) for download links.
[12.05.2009-19:45:11] <SKServ> *** Auto starting game. Type !shutdown to abort ***

That logs from night are:

[12.05.2009 - 01:06:55] <SKServ> [Purchase]: Bombenleger - Flame Tank.
[12.05.2009 - 01:07:07] <SKServ> [Kill]: sjsjav was killed (Raveshaw/Rail Gun).
[12.05.2009 - 01:07:10] <SKServ> *** Auto starting game. Type !shutdown to abort ***
[12.05.2009 - 01:07:10] <SKServ> Initializing Westwood Online Mode

And its caused by Veteran.dll because it started crashing after installation of this plugin. Is not problem in RAM when this plugin save all to RAM? Some leaks or something? You cant put it to some external file?
