Basically a small texturing pratice I did yesterday but I still suck at that - even such simple things. I wish I had more time for my photoshop and my graphics tablet. Feel free to modify the textures.

Download - look at attachment or at my page.

Edit: Of course they can be disarmed now.

i am just not a person that enjoys advantage, i used to have some skins (according to the mods of the server) and i deleted them. now i find advantage skins just stupid. all i gotta say, nothing else.

hush now k?

If you play on a server which allows modified models, you play definitly on the wrong server.

There's no way for server owners to check it, so even if we say "not allowed", we need luck to catch someone using them.

Renegade Resurrection doesn't allow any modified models.

Unfortunately, RR is not really an option for us, as we have our own modifications, based on SSGM.

Anyway I won't make something like that again. The presents are the only exception because it's so funny with Havocs slogan in mind. In general I hate that skin and replacement crap too and I'm glad that Renegade X will prevent that.

lol why renegade-x prevent that? Just need to know how textures/models working there, and all will be great (as in Ren and all other fps games)

lol try it - you can't replace anything there because of way the mod packages are "compiled" there.

The server must have RR too with full anticheat. That's why I said "you play definitly on the wrong server" when it allows modified models.

Umm, how i can try it, if this mod still on progress?
But i'm sure about one thing... 2012 will happens first! (that lazy bastards dont do anything there... 3 more years, no problem...)

You have no idea what it means to create a proper good looking model for UTIII.

It also doesn't allow you to play the game if Renguard is installed. So I really don't see the
difference...

It's not my fault when you use outdated programs like RenGuard which doesn't let you start the
game anymore.

lol i sort of skipped all the bs about advantage, but this is a really clever idea.

i have to say i lol'd loud when i saw the first screenshot.

very nice!

Btw is there a Santa model for Havoc somewhere?

Another idea like this would be to make all C4 as easter eggs with a "Easter-Bunny"-Hotwire
model XD
