Finally complete. The light tank took quite some time.
Changed my original stank and arty, cleaned up the artys darker layers, removed the scan lines and added lights to the stank.

Will consider doing the apache and transport soon. (oh and the harvester too) Enjoy

UPDATE

Completed the apache, transport and harvester.

Yes

It looks like renegade-X

Transport and Apache?
Good job!

It is a nice and clean new look. Also the vehicles still look like nod vehicles. Good job!

Downloaded. Love them
any plans of something like this on GDI vehs?

Yeah, I was actually looking at the GDI vehicles and think it could work out on them too.

I'll try it out later, if it works out okay on one vehicle. I'll most likely make another pack.

Completed the apache, transport and harvester.

Here they are: (il also update the original post)

edit: Realised Apache is very hard to see, so uploaded the screenshot itself. [Click here](#)

Download Attached.

Nice

But maybe the Harvester needs a bit more red on the hood??
