This one is way better than your old one. The textures fit nicely now. In the part you where playing hourglass you can still see a old texture. (Near the wf door)

Also those side smokepipes look better mayby add a little more space between them. Well the Crane improved a bit but still not my style to put it there

Good work!

well, does it lower ur fps.
cuz i normally play at 20/30 fps (gay graphics card) and when 4 flamers start to fire at the same time it drops to 4 fps ..

What happens when someone places a nuke on 1 of the spots where you added the chimneys and other features. Are you pretty much fucked (or if someone stands there and shoots at you, but you cant see him/her o.O)?

Too shiney for me, but looks cool.

it looks good but , the orgional exterior is still so u have o make the building bigger so you don't see the existing exterior. Also your adding the building in the aggrates = bad.
