Yes

I wanna try my hands on a beta renegade weapon

I want to replace it with the grenade launcher (theres no good models for it)

So how do i do it

I got all of the things i need to model
If u got any answers please tell me

that is an auto rifle, it's ugly, but you should model it from scratch. (which i doubt will be easy)

Of course

I found a small video of it in the thread ' renegade 2' If u can rig it

I can try and make new hand positions for the gun
