SCREENY

I fell in live with the C&C3 vehicle skins everyone was making and decided to contribute somthing in return. Two w3d files included to replace both the yellow and the metal crates.

Doesn't it look seksi with teh bl00m?

I don't think its too big. The metal crate (which is originally a veh blocker) is 2m tall and so is this. I think it only looks big there because I got right up close to it and used 1st person view to take the image. Try it ingame and see what you think.

Great work, Crazfulla! Glad to see you like the Nod Light Tank

Do you mind if I just slightly edit the textures and release them to make them.. More true?

Just wanted to say this model is being rejected by the TT / 4.0 patch, if server owners who run it could install this on their server to say it's ok would be greatly appreciated.

Also dreggy if you're still around, and feel the need, go for it.

It could be improved quite a lot if you added a simple reflect to the metal, and dirtied up the yellow texture a bit.
