Images are allowed, but please remember that not everyone is running at 1280x1024 resolution

Please try to remember that images larger than the users browser will "stretch" the entire forum tables out, so either resize your images before posting them, or upload them to the n00bstories.com Image uploader so that the users can view them in a seperate window (also this will keep the forum from running slow because of serving many inline images).

If you don't have a graphics program installed, here is a Microsoft tool you can install http://download.microsoft.com/download/whistler/Install/2/WXP/EN-US/ImageResizerPowertoySetup.exe

Once installed, you can right-click image files and save resized copies of them, it lets you choose large, medium or small.
