Is there anybody out there who feels they are talented and are willing to make videos of some matches?

I think it would be nice to have at least one video for each round of the tournament. People who are unable to play in the tournament can at least watch the action and get a good feel of the competitive play. Players can also watch other matches that went on during each Saturday. If anybody is interested please post here!

60 fps is the highest you can get with normal versions of fraps. A good computer will maintain a
constant 60 in ren with fraps on.
