The long awaited skinpack is finally here!

Massive Pictures

This skin pack includes all GDI Vehicles including the Orca, Harvester and Transport Helicopter, and all Nod vehicles, including the Attack Bike, Transport Helicopter, Apache and Harvester.

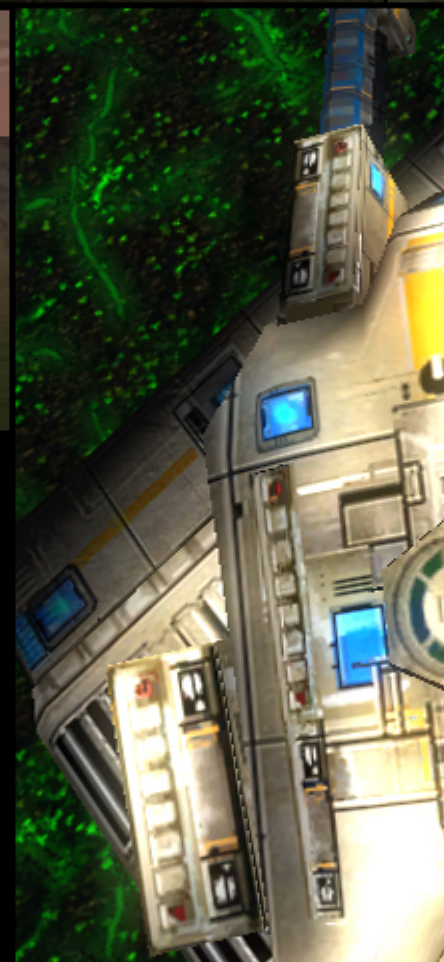

The pack does not include any Extras vehicles.

Enjoy them all! =]

MODERATOR EDIT - Vehicle hulk (AKA "shells") skins are also available here.

The interiors are done for now, Di3's airstrip already kinda suits the Tibsun theme and the Refinery... Well, it doesn't have grass in it. Or secret rooms. But I'm focusing on Nod exteriors right now!

I fucked this up.. I forgot to include the Multiplayer Orca, instead I accidentally put in my Single Player orca skin -.-

Here is the Orca skin for those of you who have already downloaded the pack:

C:\Program Files\EA Games\Command & Conquer The First Decade\Command & Conquer Renegade(tm)\Renegade\Data

Place the DDS files in that folder. And yes there are still servers running.

To make a new account for Renegade, 1. your nick has to be 3 characters long, and 2. your password must be 8 characters long. Just make up a name that you think has probably not already been taken.

On your first try you might get a message saying password was invalid, that means the nick was already being used. After the first try I don't think it will give you anymore messages, so if you keep getting blank server list try again with another name.

Doesn't sound like it worked, I haven't personally heard of any other reason the servers wouldn't show besides not actually logging in.

HUTCH wrote on Tue, 12 January 2010 12:09ok then im stuck in the profile that didn't work and its automatically logging me into it

At the "Start Game" screen roll your mouse over to the left side where that bar is, when it opens click "My Information", Uncheck the "Automatically log in with this account" box.

can i use skins for The First Decade version of Renegade? if yes, please tell me where is my data folder because i have 3, one is Westwood under the C: drive, the second one is Westwood under C:/Program Files and it has 2 data folders and the third is a folder named "Renegade", and is under C:/Program Files/The First Decade. note that the folders i mentioned above have a data folder, so nothing is wrong with the folders, i just need the location of The First Decade's data folder. if i cannot use skins for The First Decade version of Renegade, just reply, "no"

[View Forum Message](#) <> [Reply to Message](#)

Common places for the Data folder to be located.

C:\Westwood\Renegade\Data\..

C:\Program Files\Westwood\Renegade\Data\..

C:\Program Files\EA Games\The First Decade\Command and Conquer(tm) Renegade\Data\..

You put the skins into the data folder here, depending on what renegade you're using. To find out what renegade you're using (and where it is located), right click the shortcut (either on the desktop, or in the start menu) and select Properties. In the Shortcut tab, you should have a Target box and a Start in box. The Target will show you exactly where the file this shortcut is located, and the Start In box usually contains the folder that file is contained in. Install the skin packs into the data folder which this shortcut is referencing to.

i think skins for The First Decade version will never work, there is no attack bike in my Renegade, which means the skins are for some other kind of Renegade:(

[View Forum Message](#) <> [Reply to Message](#)

Skins don't work like that.

If my memory serves me correctly, there is an order in which skins are loaded.

From the data folder, it will load skins inside .mix maps and .pkg packages. If the skin isn't found in there it will look in the data folder for a raw .tga or .dds file, and if it can't find it there it will look in always.dat (Correct me on this if i'm wrong)

Just because you don't have a model in your data folder doesn't mean that model is inside a map which is loaded. If the model is there, you can just drop the skin inside it.

By default, Renegade has the attack cycle, you just cannot buy it from the normal purchase list. You will have to use the extras presets list, which i've forgotten the code for. Search the forums for the code.

Posted by [Omar007](#) on Tue, 16 Mar 2010 08:06:42 GMT
[View Forum Message](#) <> [Reply to Message](#)

afaik it looks for raw files in your data folder first. If one is not found it looks in the mix/pkg of the map, then, if its still not found, it loads from always.dat???

What i know for sure is that it first looks for loose files in your data folder because it wouldnt be possible to have customs skins with only copying to your data folder. And its just that easy

Posted by [Zion](#) on Tue, 16 Mar 2010 08:39:00 GMT
[View Forum Message](#) <> [Reply to Message](#)

Makes sense, thanks Omar, i knew it was some order, but i didn't know what came first, just that always.dat was last.

If i recall correctly:

Press F8 then type:
EXTRAS FNKQRRM

Then hold ALT when you click characters or vehicles in the PT's.

Note that this doesnt work online, unless its an un-laddered server without extras exception list

oh.. i'm curios too, there should be an attack bike as Nod only has 1 Chameleon but GDI has Pickup Truck and Sedan.. but i watched a video on youtube they could play on maps with attack bikes, what if it's only available on the single Renegade? because if you're using the single Renegade and i'm using The Frist Decade Renegade.. where the hell can i find the attack bike? but if you're using The First Decade Renegade, then maybe only the single Renegade has the attack bike.. btw, how do you get SSM launcher vehicles?

Jus clearing something up here.

TFD and Rene have almost identical files in the always.dat. If you've patched your renegade properly, then you DO have the attack bike, it can only be selected on some fan maps tho, such as tiberium redux.

b4 u ask where to download tiberium redux...www.game-maps.net

They're still as awesome as ever too.

If you want something to do, you could make a MASSIVE pack that contains all the skins/models etc that you ever created for Rene?

It would be pretty epic.

I'm sure alot of people, including myself would be grateful.

The biggest problem with that is I have no idea if I still have any of those skins. I've moved computers 3 times, but I'll have a rummage around.

Failing that, I could always create new ones in any fleeting spare time I have. My photoshop skills have improved drastically since I was last here.

Examples:
Toggle Spoiler

My own model, textures, etc. Background photoshopped and blended in post-render.

A 'business card' of sorts for my gaming community.

And a big one, which I'll just link, my current Desktop:
