Things added/changed:

Tiberium clouds, Lights under every light source, changed most textures and reduced the fog distance.

Previews:

Images

Video

I CAN'T SEE

I CAN'T SEE

\*Crashes Hummer into a pole\*

Looks awesome though.

This is very good. It actually looks like a city now and I love the textures.  
probably your best map replacement so far.

Pretty nice, but I always figured you could do so much more with this map. Here's some ideas:

-The backdrop buildings look like shit, change their model. It's not as though it affects much physical gameplay.

-Maybe add a few more poly's (and make use of them) for the buildings all around the map? For example, making windows actually polygonal rather than just a texture on a box.

-Add a few light fixtures to the interior hallway areas. Maybe even make a few cosmetic doors for a bit of added effect.

-Tiberium gas is annoying, please get rid of it.

-Instead of dazzle, maybe use a modeled transparent light effect? Basically just a white texture (or no texture) image that makes use of blending effects with a fully transparent surface. Probably a better way to do that, but you get the idea.

Besides that, the textures are awesome, looks alot nicer now

Agreed. Actually I have textures I edited a while back to make them 10 times better. You can put them in your map if you want.

back buildings look better

it's nice

but a bit too standard for me =]  
\*stays with dreg's city skin\*
