Here are two NOD logo skins I made, one has a spider web on it, the other is just a cool looking NOD logo with a photoshopped effect (Fire maybe?)

NOTE: You can only use ONE at a time, so either install the .dds file in the folder "NOD Logo" or "NOD Spiderweb Logo" from the downloaded archive.

You can download the file in RAR form from Samous Ind. File Base here, or in ZIP form from CNC Renegade forums bellow.

-If anyone wants, I could make more GDI\NOD logos, with different styles.
