i have problems with my level editor if i click at exe the start window comes then comes a mistake calls (the program has find a mistake should it be send or not) and i need it^^.

i have  
windows XP

i have look into registry if pathes are right

i have reinstall it 3 times

i have repair it 2 times

and that all happen after i searched through it and test the editor. since this time is the mistake

the file is in german but i hope anyone can help  
now i have one with the english text here^^

Make sure you have Renegade installed on the same hard drive you have level edit installed on.  
For some reason It wouldn't work with me before when I had it set up on different drives.

the version of my level editor is:  
6.14.11.9562  
it starts with the driver name:  
nv4\_disp.dll  
and the grafik card is:  
NVIDIA Geforce 6500 LE

and if i start it crash at:  
(loading preset library)

and i hope anyone can help me now with this informations pls.
