Hi everyone,

I just created a font for my HUD, but it doesn't work for a unknown reason.

The weirdest thing is that the standard renegade font8x8.tga doesn't work either.

If anyone know the problem, please help.

That did not work The font still wont show up in game.

And a question: Does renegade look at the name of the file, to decide the size of the font? Maybe it just wont get it.

well, it seems that font8x8 is doomed and just won't work.

But the other formats do, so I will try to make the font in another format (without making it bigger)

I used 12x16.tga and it worked.
