As you may have seen I was working on a replacement for the original fugly tunnels from the map C&C Volcano.

I finished it and now its time to share

Before you download it, check my video for the replacement to see al the modifications in it

<http://www.youtube.com/watch?v=QQUsfhDDS3A>

I'm affraid this will only work online aslong as you are NOT using Renguard (and RR?), because that will block this.

(check readme inside the rarfile how to install this)

I know it still has some minor bugs but I won't be fixing them. The reason why is that I would have to re-do all the LevelEdit work which is what I am to lazy for.

Download here ->

As i said in the Mod Forum thread:

Awesome job

(You should join a mod team)

Can't use it as I use RG.

But I think theres lots of people who use RG/RR still...so they can't use this either

Edit: Because this map is so awesome. I'll talk to Blazer about adding it to exceptions in RG.

There are no problems with rr. It works fine with it

btw RG sucks!

Nice release, but not completely bugfree.

- 1) The lava has been deleted (by level-edit probably). Now i can only see blue down in that crater .
 - 2) Looks kind of weird at where the wooden planks are attached to the ground that seems to be hanging in air
-

3) Texture mapping bug (on the floor) at the tunnel that leads to the top of the mountain.

also for me, when i'm outside tunnels like in gdi or nod base everything is dark like it's night time, but when i get into tunnels it becomes light again. i havnt messed with my brightness settings so i dont think its something i did

there are no vis problems that i know of, i made the sky darker because it made the tunnels look better. after that i added a little light inside the tunnels.

might made it a little to dark, but like i sayd i am not going to fix it because of the shitty LE work i would have to do all over again.

best mapping of you so far imo!

great work

guess i'll just have to deal with it and use it anyways =3
