I really don't understand why are you people fighting it. I agree it's HUGE advantage, therefore a cheat, BUT the site is obvious and the community that is left is so small, that they can get it easily.
Why the censoring?

I agree with error, dont undestand why you removed that link.
I dont wanna start a big discussion now about the bb.
Buildingbars are big advantag, but not a cheat. Mostly every big server allows them. St0rm, Jelly , Atomix , RenCom and and and.

All of u agree it's an advantage and a significant one, so all agree it's a cheat. Our rules dissalow links to sites containing cheats.

It's a good thing you keep the BB away from atleast this site...you don't have to make it to easy for people to get it....
I agree with you, it shouldn't be allowed in the first place, but I think this isn't worth it to discuss here

Yup, I still use it every so often, I really wish this could be revived and updated again, loved the old Renhelp site, that is the only tutorial site alive, and working.
