This problem was posted before... Are you running in admin? Try creating the folder where it
needs to normally install manually?

I followed that link and that wasn`t help me
I running this install as Admin but that wasn`t help me
I created a folder but i receive message that folder is existing and replace or not independly of
answer i have that same problem
Any other Solution?

EDIT: I copy Install folder from CD (with repacking cab files) and game is running but i wish to install patch (i must find how to register the game in system)
if something will be going wrong i will post here
THANKS
