RxD is back and is now hosting a public server.

All RxD players come back.

RxD is a 4 year old mod that started out in the renegadedemo. The mod is a full conversion mod that contains new maps and detailed renegade maps, pimped weapons, vehicles, and Detail lights added on every map.

Download the RxD.msi Installer and install. After installation you can use the rxd shortcut created on the desktop to join the server.

Server Ip 67.159.16.150 Server Port 4848

It is but it has a lulz factor unlike any renegade server.

Well maybe saying its a full conversion mod is over the top since it doesn't have new vehicles and characters, buildings. A full conversion mod would be like apb or reborn.

RxD adds about 300 mb of files in the always files with new maps and presets.Pimped weapons, vehicles with no lod,Draw distance is set from 300 to 600, pimped vehicles, ect. I will show a changelog of everything that's in RxD when I release 4.2.

Hah, I take it you got it working. Good job man. If people play, may be tempted to dust off my perl
books and tweak bot. You got anticheat code too?

Well it seems as if the download links are dead.   Anyone know if it works and if it does where I
can get it?

Oddly enough I *still* have it in a folder I didn't touch for at least 3 years. It'll take a while to upload
with my 35kb/s but i'll post it eventually.

You don't need to download anything. All you have to do to join the RxD server that is currently up.
