Whats up people!

I started a new education called Communication & Multimedia Design this year.
In the first period we made a video, and now the second period we are making a computer game for a nature history museum.
I have been creating some 3D models which we will implent in the game.

I was just thinking maybe some of these models can be used for Renegade!

Maybe someone has some suggestions for what it could be replaced.
Let me here some ideas.

I modeled and textured these objects myself.

Fish in a bucket.

Mousetrap

Elephant Teeth

Horse

Globe

Banana

Wale Tale

Change the pistol into a banana

Nice models
