I purchased the PNY GeForce Ti 4200 for \$175.00 after a rebate. For the price I am more than happy. It jacked up everyone of my games, nice to play at high resolutions with no framerate hit. It is easy to install as well. Most of the capabilities of the card are not yet utilized by the game industry. Can't wait for DOOM III!!!!

VisionTek makes a kick butt card -- and it's a reference board -- so you can use the nvidia reference drivers.....I have one and i'm one happy camper.

I upgraded from ATI 32mb to GeForce3 64 mb DDR. It made lots of improvement in my game.

I find it hard to imagine that ASUS won't stand behind their product.
