I found rail in patches dds file name been curious about it since...
Was Patch meant to have a rail gun?

That's just the texture used in the Purchase Terminal menu that you select to buy Patch.

The name means nothing. GDI's chaingunner has the filename "hud_cnc_goffshot.dds" but that doesn't mean he was supposed to have a shotgun.

Actually, he probably was. Nod officers had them in the missions, so it's likely there was going to be an alternative officer loadout.

Also, there was going to be grenade upgrades, including Napalm and Tiberium grenades.
