this has come as a big shock to me because The makers of Counter Strike have not shut down sites distributing aimbots. If anyone has any more information about this POST.

Story:

I was surfing the web looking for aimbots for Counter-Strike and I come across a site advertising an aimbot NO JOKE!. But just as im about to down load it my parents tell me we have to leave. So i book mark the site and come back the next day. Guess what the site is now a direct link to <http://www.ea.com>. Creepy how did they find and cofiscate the site so fast weird.

There may have been Aimbot's for counter stike once but Renegade only has the click bot which sucks and does not give you even the slightest advantage at all...

Focus less on searchng for aimbots and more on getting the true aimbot SKILL!!!.

at least we now know ea is doing something

I have to express my opinon here in that Couner Strike is not an easy game at all the damage is real and the players are excellent alright maybe it requires less strategical precisson than C&C Renegade but it is certainly not easy.

-Sk8rRIMuk

actually it requires more skill but its easier to kill people if you know what you are doing. All you have to do is not run in all guns blazing, wait for the to attck you, or edge slowly around the corner. Then try and get around the fighting and sneak up on them.

then if all else fails run in all guns blazing

You guys should open your minds for once. And not bash a guy just because he is looking for cheats for his friend. Heck, who knows if he is telling the truth.

But what I see on his posts are... He is telling everybody that EA is doing it's job on closing web sites for those cheating bitches who can't aim because of lack of self control on aiming. Be a little more sensitive...

I'm sick of all this shit about no aimbots. Truth: there are two (known) that work for Renegade. One is dubbed "the clickbot". Someone a few posts back said "that it only had about 3% accuracy" how would he know? He downloaded and used it I'm thinking. Based on all the flames aimed (no pun intended) at the author of this topic, I'd guess if he said "I tried out the clickbot out of curiosity" you would all call him a loser? The other aimbot is a modified OCGHook 6 (originally for counterstrike and any direct3d or open gl game) Modified a little bit, this aimbot is just as potent as the 90% headshot rate one that is found in Counterstrike. Anyone who has some knowledge of c++ can edit the source of the OCGHook. You have to remove the weapon timings and implement your own from Renegade. you also have to rename the find\_exe string and change it from %:/program%files/sierra/half-life/hl.exe and point it to the renegade executable. IF you get it right it will (in fullscreen mode) allow you alot of "cheats", examples are a nice 90% headshot rate (using some kind of modified models of the infantry which have "zones") and a few other ones I'm, to lazy to post. When I finish coding it correctly AGAIN (I deleted the first one accidentally, no backups either) I will decide if I want to release it. I might just release it to some key individuals to test out and see, so they can shut everyone up, but untill then I will have it. No need to worry until then, cause I dont play many ladder games unless I'm screwin' around with my friends... uh other than that, yeah you must suck at CS. I'm [AoA]Zer0, the one that won the tournament in November 1999 and then subsequently had my name enshrined in the HOC on Sierras website. Last time I looked on the AoA servers, i had a 99 win streak with 125 kills and 0 deaths. I was banned from almost every CS server for having "aimbot" even though I had PunkBuster running and never used an aimbot, well once I used a wall hack to see if they really worked. wow long post...ugh im tired.

-imortal

p.s. spam! spam! SPAM! SpAm! sPaM! ok i'm done.

I must agree with Imortal.

Its foolish to say there are no cheats. Although your definition of cheats my vary, you all know there are the click bots/color aim bots, whatever.

The fact is CS has FAR more users than Renegade, and thus, a greater percentage of skilled programmers and others. And as the homo punk buster hard drive scanning program (work of the Nazis) makes the programmers of these programs unhappy, they will look into other games. As

happened, who knows. If it does, its going to stay secret and very hard to get for a long time. Until about the time they become tired of the game and make it publicly available, and thus every lamer n00b will pick it up, just to show how good he is by using a program to get kills to satisfy their ego. And we all know every one of WW's games has becomes plagued with cheats. I fail to see what makes one game so different than any other. No game is perfect, and is susceptible to cheats and

Enjoy the game now, you never know when something could change it all.

ImortalI'm sick of all this shit about no aimbots. Truth: there are two (known) that work for Renegade. One is dubbed "the clickbot". Someone a few posts back said "that it only had about 3% accuracy" how would he know? He downloaded and used it I'm thinking. Based on all the flames aimed (no pun intended) at the author of this topic, I'd guess if he said "I tried out the clickbot out of curiosity" you would all call him a loser? The other aimbot is a modified OCGHook 6 (originally for counterstrike and any direct3d or open gl game) Modified a little bit, this aimbot is just as potent as the 90% headshot rate one that is found in Counterstrike. Anyone who has some knowledge of c++ can edit the source of the OCGHook. You have to remove the weapon timings and implement your own from Renegade. you also have to rename the find\_exe string and change it from %:/program%files/sierra/half-life/hl.exe and point it to the renegade executable. IF you get it right it will (in fullscreen mode) allow you alot of "cheats", examples are a nice 90% headshot rate (using some kind of modified models of the infantry which have "zones") and a few other ones I'm,to lazy to post. When I finish coding it correctly AGAIN (I deleted the first one accidentally, no backups either) I will decide if I want to release it. I might just release it to some key individuals to test out and see, so they can shut everyone up, but untill then I will have it. p.s. spam! spam! SPAM! SpAm! sPaM! ok i'm done.

Don't release that aim bot, nor create it in the first place for that matter

Lol...

So what's your point? Ohhh, the little n00b looking for a friend? lol :rolleyes:

N00bs these days. :rolleyes:

Sir Phoenixx you should scroll through this tread looking only at your comments...

Regarding aimbots, think of it this way - (assuming you are a good sniper) - have you ever been so pwnd that you think the other guy has an aimbot? Not me (except on very laggy servers which explains itself). Even if some people that I play with do have bots and tuned them down (added less acuracy, slower aim speed) as to not be noticed, I still don't care cuz I can own them or have fun trying.

Anyways the Renegade community is quickly dying and I think all we need is some lamer to make a good bot then I'm sure the community will completely die. I think devious programers understand that.

hence why i am wary at releasing it. when its done, i might send it to a few people in the community, or i may just say fuck it, il keep to myself. im not going to not make it because programming intrigues me.

I think the only reason that a good working aimbot + other hacks is not widely available for Renegade is the simple fact that the game is not that popular. Especially compared with something like Counter Strike. Which really we should count ourselves very, very lucky indeed or else we would have to put up with much more than aimbots me thinks.

Well to those coders out there who are interested in how games work and subsequently make hacks, cheats etc. I will not tell you not to make these but rather I would kindly ask that you please do not release them to anyone.

Wee

well as it looks now (talkin with some people) chances are i may give the finished product to a few key individuals, but otherwise, im just going to keep it to myself.
