I'm trying to create macros for the Logitech G19.
Doesn't work.

Even if I have set the repeat-function to OFF, the last key is repeated endless....

So, if the macro is refill (# Delay 5), it will go on to repeat the 5 forever....

Why?

Seems to be a problem with either Renegade or (intentioned ?) with the TT-Patch...

In Windows the Macro's work well, but in Renegade it's impossible to record a quick macro.

And the macros don't work properly.
