**Subject: A LE bug with 4.0?**

I made a map using 4.0 and added silos, noticed that the normal docking animation didn't work on the refineries. After screwing around a bit I was able to get the animation to work again but only after deleting the silo's building controller, and if I put the controller back the animation would stop working again.

The silo controllers were made in the usual fashion, by temping the ref building controllers and setting building type to none and having no vehicles for harvester.

I never had this problem until I started using TT 4.0. Any ideas as to what I'm doing wrong?

So no reply?

Am I the only one having this problem? If not is there a work around with scripts?

I did try adding the dp88 and jfw credit trickle scripts to a generic building controller so I wouldn't have to temp the ref controller but couldn't get either to work properly. Not sure if they need to run with another script (maybe with daves arrow) as I'm a bit of a noob.

Please help.

Maybe this should be moved to the mod forums.

I don't even remember writing one... but if it's a dp88\_ one then I did (and forgot about it) and almost certainly is linked in with my custom building controller code for AR and is unlikely to work as a standalone script.

Can you check whether this same map works with scripts.dll prior to 4.0, and if other maps that have silos and refineries work with 4.0?

StealthEye wrote on Mon, 09 January 2012 11:31Can you check whether this same map works with scripts.dll prior to 4.0, and if other maps that have silos and refineries work with 4.0?

I found the original .mix that was made pre 4.0 and tested it:

With 4.0 installed I had the same problem with the docking animation.

Reinstalled renegade with only 1037, tested the exact same map and it worked perfectly.

4.0 seems to cause the problem.

Edit:

I found another old map of mine that has silos and refineries.

Tested both maps they worked fine then installed 4.0 and same problem.

The same thing also happens when I play MutationRedux.mix.

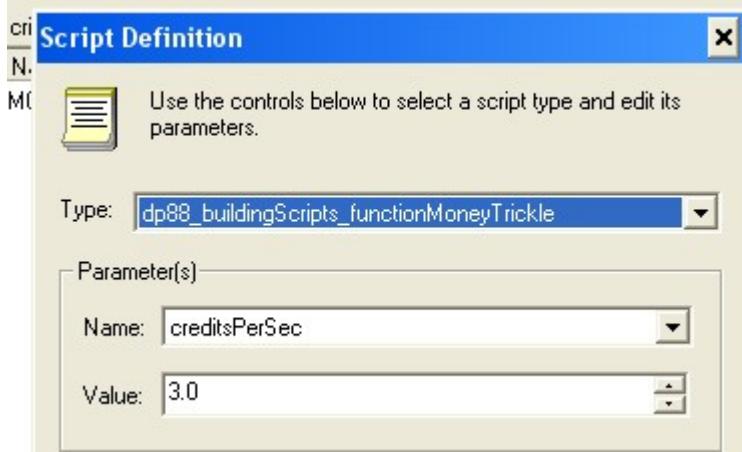

@danpaul88, this (I think) is the script I am referring to.

@danpaul88, this (I think) is the script I am referring to.

---

Yeah, that script won't work without my custom building controller code, its designed for  
capturable tech buildings in ra2:ar
