This is yet another spawner-related crash. On what map was this?

I didn't even get to join the map. My client crashed before I could even join. If you mean the map I was joining, I can't remember as I have a terrible memory. The only detail I remember is crashing before being able to join the map.

Maybe someone of Jelly who has logs for this can check what map was run. Date and time: 2012-06-25 23:06:00 (I'm not sure what timezone though, probably YesNoMayb's local time.)
