This plugin fixes an exploit where if you leave the game after dying but before respawning your death count doesn't get incremented. The following simple code is used:

```
void LeaveDeathsExploitFix::OnPlayerLeave(int PlayerID)
{
    GameObject *obj = Get_GameObj(PlayerID);

    if ( Commands->Get_Health(obj) == 0.0f )
    {
        Find_Player(PlayerID)->Set_Deaths(Find_Player(PlayerID)->Get_Deaths()+1);
    }
}
```

To install place 'LeaveDeathsExploitFix.dll' inside the root FDS and add an entry for it under [Plugins] in SSGM.ini.

You can contact me on renegadeforums.com under the nick 'iRANian'.
