i still have it but i don't have a place to host it, it's around 500MB so i cant just use an upload
provider. there's also a view small bugs, most notably you need to delete one of the config files
after installing or the mouse and keyboard doesn't work in-game.

did anyone find this ? I have lots of guys who want to get back in to renegade who would love the link to a renegade download ? not sure how they would go about getting valid seriels

Subject: Re: renegade standalone installer
Posted by ExEric3 on Sun, 16 Sep 2012 18:21:30 GMT

I gave iran ftp details where he can put it.

tells me the server is down

edit: it hangs on connecting to the ip

Error: Connection timed out
Error: Could not connect to server

okay, reuploaded and exeric3 checked it, should be fixed now.

if wrs tries the installer ask him if his mouse and keyboard immediately work after he starts playing, in previous versions of the installer it didnt and I think I fixed it now.

after he installed and tries playing he'll get a pop-up about the auto-updater installing updates, there's 3 of them, the first one takes the longest as it contains modified maps, the other two finish really quickly.

Why haven't you included the fixed maps then? If you made a new installer...

So what does installer actually include if I may ask?

Is it stock ren + 3.4.4?

good job nevertheless, never new this was arround.
