I have purchased The Ultimate Collection recently.

I made my installation default location of all my games in D:\Program Files (x86)\ drive (needed the space, I had it and moved it)

Not 100% sure if this is the issue or not, if it is, I'm hoping to get around it if it's possible.

Issues is that I have tried many ways to get the patches and scripts to work. I haven't had any luck.

Please no C: drive required lol

I assume you've followed this sticky then?

<http://www.renegadeforums.com/index.php?t=msg&th=39331&start=0&rid=2> 3454

If you did, any specific step that gives you trouble?

Or maybe crashes/errors after following the steps?

Discovered patch version "Renegade_1037" came with the package. =/ user error xD

Now, the script (tt-scripts-4.0patch1.exe) on the other hand, says "Failed - Network Error" (using Chrome) when I tried to download it from the link provided for it. So, I cannot do the first step...

It works just fine so try using another browser. Firefox or IE maybe?

/I use Firefox myself.

Correct... Problem is solved due to my anti-virus protection (avast). I had to stop my services to get it to work and install.

I switched to Chrome from Firefox recently.

Ok I'll add a post to the sticky (editing is no longer possible :/) that Avast AV may cause installation failures as well (in addition to Norton/Symantec).
