The graphics are on par or worse than any standard FTP (Free to Play) fare that currently exists. Certainly nothing to fawn over.

Renegade X shouldn't really be classed as a Free to Play game, since that term is widely used to describe games that are free to play initially, but then have some sort of additional paid-for content or premium features. F2P is similar to what's called the freemium model.

Renegade X is good old fashioned freeware through and through.

Not sure if serious. You linked a thread where gameplay would essentially be a carbon copy of an old mod I worked on many years ago and I'm only assuming that you're using that thread as evidence that I don't care about gameplay or potato? Please elaborate because I'm finding it difficult to see what the purpose of linking that thread was - except for laughter. Because that thread is funny. Pure comedy gold. lol.

Renegade X is good old fashioned freeware through and through.

It's still a FTP game (Free number two play?) by virtue of the fact that it's free and it's a game. It's certainly not a freemium game by any stretch, but it is free.

It's not a F2P game. F2P doesn't mean that it's entirely free to play as the term has mutated to imply that there is in fact things to pay for within the game.

For example, World of Tanks, War Thunder and Planetside 2 are all F2P games because they are free to play, but you have the option of paying for other ingame content. Star Trek Online is an F2P MMO, which is another good example.

Also, the acronym FTP is never used to mean Free to Play. It always has been and always will be F2P. When ever I see FTP I think of File Transfer Protocol.

Freeware is the term you're looking for because it's entirely free with nothing to pay for ever.

The game looks incredible.

I don't know where all the hate is stemming from. The original game definitely wasn't very complicated. I don't see why the original gameplay couldn't possibly be replicated and improved in RenegadeX.

It's a chance to breath new life into Renegade, and let's face it, it desperately needs it at this point.

But, hey, by all means keep sitting around circlejerking a game from 2002.

Freeware is the term you're looking for because it's entirely free with nothing to pay for ever.

If we're going to delve into technicalities, the number two doesn't mean the word "to" and therefore the acronym is FTP. Otherwise, you're saying Free Two Play. Like when someone says Got Two Go. It doesn't make sense.

RenX is a FTP game as far as I'm concerned. Freeware would be equally applicable, but the terms aren't mutually exclusive.

Renx: S'up, bruh what it do

Jaspah: I have a particular distaste for RenX as it holds the dubious honor of being the only program I've used that has managed to blue-screen Windows 7. That and it played terribly. I can't imagine they suddenly made it magically awesome in the span of a year. Do I hope it comes out well?

Sure - I also hope for a lot of other things. History generally speaks for itself. If RenX doesn't suck this time around I'll be impressed. If it does, I won't be disappointed. It's sucked twice so far.

RenX is a FTP game as far as I'm concerned. Freeware would be equally applicable, but the terms aren't mutually exclusive.

FTP may be what you like to call it, but the rest of the world uses the acronym F2P. It may not make sense, but that's the way it is.

Remember, "it's Nod, not NOD" and "it's texturing, not skinning"? Same type of deal here.

RenX also isn't a F2P game because the it has no micro-transactions.

If you want some clarity on the acronym and the business model, please have a skim over this link and you'll find out that free-to-play doesn't mean totally 100% free in the same way that freeware does: http://www.gamasutra.com/view/feature/134959/the_design_of_freetoplay_games_.php?print=1

Free To Play, not Free Two Play. I see what you're saying, but that doesn't invalidate my point.

I'm not going to start using the number two to replace the word "to". Context should be enough. If I say FTP game, it's pretty obvious I'm not calling it a file transfer protocol game.

Your other examples are iffy - no professional artist I know calls a texture a "skin" (because skinning is something entirely different than textures) and most people who can read know that Nod isn't written as NOD, AKA Naval Ordnance Disposal.

No professional game designer I know uses the acronym FTP to denote Free-to-Play, but I get the logic behind what you're aiming for.

Also Free-to-Play means something completely different to freeware and is actually closer to meaning freemium, so the texture/skin comparison isn't far off.

That's because it was posted on reddit.

Also, as far as the "free to play" thing goes, from my understanding that was the agreement between the game's team and EA. EA allowed them to use Command and Conquer assets as long as they never charge money for the game.

Sounds good to me?

hopefully the maps are scaled a bit larger than Renegade ones, because 64 players on a Renegade map sounds like a not so fun time lol

Subject: Re: RenegadeX

Posted by [Starbuzz](#) on Mon, 02 Dec 2013 18:36:50 GMT

[View Forum Message](#) <> [Reply to Message](#)

hey liquid, the maps seem to be scaled up. I found an old 2011 video showing the maps:
<http://www.youtube.com/watch?v=njMzqLLtqWU>

I think Fobby and Co did a great job. I was unable to play Black Dawn due to a Vista bug so the last time I played ReneX was their first playable release.

I will be installing UT3 to practice first person boomhs aiming skills with the Shock rifle so I will be ready for the ReneX Railgun!

Hope it plays like Renegade when it comes to quick-repairing vehicles, dodging hits, sneaking in with helicopters/tech/beacon on some maps and so on.

Once on Islands, I saw crush's Mobius with a rep gun fucking expertly quick-repairing all the way to back of the WF door from the base entrance...lmfao...while getting shot at by the entire Nod team. It would be amazing if ReneX could replicate that.

I mean that's a core feature of Renegade...quick repairing and getting back in the vehicle ready to fire that next shot so you win the tankfight! So I do not know how the getting in and getting off animations will interfere with that...hopefully not. Because that is a key feature.

Does anyone know how the nicks system work in ReneX? Will there be a direct connect option?

The gameplay is much better than Black Dawn. Remember Black Dawn was merely a way for them to accomplish something (building original assets since they were no longer permitted to use UT3 stock assets) while giving fans something to play with in the mean time. It was by no means a polished experience made to represent how RenX's gameplay would be.

It does play like Renegade, but it isn't a carbon copy. It's kind of hard to explain. Mainly because I don't want to say too much about it without the team's permission, but also partly because of how the game's design is handled. It manages to stay very close to what makes Renegade Renegade but still feel new and fresh. The balance is very close to how it was in Renegade with a few obvious changes due to some new weapons and weapon controls/functions.

And yes the maps are slightly larger because infantry can now sprint.

Unreal has been used to make MMORPG's, RTS, FPS, Puzzle games, flight simulators, Third person shooters and many other game types.

Why do you feel that they wont be able to make a game like Renegade on it?

I've never used the engine, so maybe you have some experience with it?

Competitive Renegade is clanwars/funwars/lobbywars. The main point being that both teams are communicating on teamspeak, trying their best to defeat the other team.

Public server Renegade is 'casual' Renegade.

Anybody testing Ren-X ever play a Renegade clanwar before?

Subject: Re: RenegadeX

This is a clanwar player's mind during CW's:

public player's mind during public server games:

I think it is fair to say that CW players can throughly test gameplay mechanics much better than public players who are just going to be fapping over the Unreal 3D models, first person vehicle views, pretty explosions, and hiding under the tall grass looking at that pretty gun remakes.

I agree with you that smaller games do indeed allow for better testing the balance than large games, but the size of the game doesn't have anything to do with CW players or not.

In any case, it doesn't matter if CW players like it, in the sense that the general public should like the game primarily for it to be a success. I doubt any game can become and remain popular by just clan players. They might play an important role in keeping it alive and improving the game, but they still need pubbers.

lol if that's true, particularly the random spread, since if you're making a Renegade clone it would probably be quite logical to emulate the fact that no bullet ever deviates from its trajectory, ever? Changing that = not Renegade (though arty shells do deviate some)

If you don't think bullets have random spread in stock ren then you weren't paying attention. Some do, and some don't.

And EWD, I think the point was that competitive teams that play together and work together could test the balance well. I don't believe anyone besides Starbuzz(I didn't even know he ever did CWs) was trying to ignite a debate about the skills of normal pub players vs CW players. I think the point was that you'd get more of a sense of the balance if you didn't have a bunch of people going lone wolf, and instead had a team cooperating together.

Now I'm remembering when Spooky would randomly get SBH in our CWs lol.

Okay yeah the chaingun and things like that do have a spread, but how much of a spread? barely even noticeable in the slightest

what I think of when they say bullet spread is that the ramjet and sniper rifle no longer follows a perfectly straight path, which may not be true (but if they did change that, whether it's completely unrealistic that is as Renegade as Renegade gets)

[View Forum Message](#) <> [Reply to Message](#)

I think some of the hate is justified. You can't deny there wasn't or isn't at present - a circlejerky

/arrogant mindset regarding cw cc players that permeates through the forums and in game from time to time.

Ermgergerd, do u even clan wars bro? Did u even clan wars bro? o what's that? I can't hear you over my incessant fapping to the old school cw players. DAE oldschool rene players? Only Old5ch00l3r5 will remember this, etc.

Conversely, he could just be jelly.

On topic: This community is fucking small. Just allow as many players to test as possible. Who cares if you get less qualitative feedback; it's not like you're going to have a huge disgruntled player base if perfect balance can't be achieved in one patch /release.

[View Forum Message](#) <> [Reply to Message](#)

There's a reason why we took two years after Black Dawn to develop the multiplayer version. We heard the feedback and constructive criticism, and took our time to develop a better game. It reminds me of the people who judged C&C Renegade by its mediocre singleplayer and missed out on the multiplayer. C&C Renegade is a multiplayer game, as is Renegade X. Whether you enjoyed it or not, Black Dawn was downloaded over 800,000 times, and most reviews were positive. Most of the criticisms had to do with the AI (which we didn't program in BD) and voice acting - both of which have nothing to do with our multiplayer mode. We've coded a completely new AI that can actually play C&C mode - buy vehicles and characters, defend and attack the base, repair buildings and units, and behave challengingly. Even the way our weapons and vehicles handle is completely different.

Now, I know you won't take me on my word, and that's why I'm inviting the RenegadeForums to take part in our Community Beta Test. I am specifically lending this opportunity to the naysayers here (ACK, iRANian, danpaul, Xpert, liquidv2), the Renegade oldies, TT, n00bstories, Jelly, and pretty much every C&C Renegade clan or community out there - dead or living. Go here: <http://www.renegade-x.com/forums/viewtopic.php?f=11&t=71158>

You can either help us in giving life to Renegade and C&C mode, or you can continue sitting on your hands complaining until the game dies. W3D Ren is not getting more popular. If anything, it is just about dead. On the other hand, our trailer got 100,000 views in three days. It got on major gaming sites like PCGamer, RockPaperShotgun, Kotaku, and many others. Renegade X is happening now, it is relevant, and it is the way forward if we pull together as a community.

Westwood is gone, EA is not going to save you, and so the Renegade community needs to pull together and do something for ourselves. Plenty of Renegade oldies, including old clans and communities, are meeting up at the Renegade X forums and reviving their servers and groups on February 26th 2014. We're giving all the old Ren communities a chance to revive and reorganize themselves.

No game is perfect, and that's why we need your help. There's no room for old rivalries and bickering. That all leads nowhere. If you have something constructive to say, then join us, sign up for the beta and tell us what's on your mind. Make Renegade X a better game, and if you're not

interested, you're more than welcome to stick around in W3D.

The most obnoxious part of RenX is that they chose the most uninspired art direction possible. Instead of having a FPS that actually looks like Command & Conquer, we're getting another generic FPS in the vein of Call of Modern Battlefield: Medal of Duty IX - a forgettable game with no striking visual style. When you're trying to develop to "AAA" game standards, doing yet another generic FPS with C&C elements tacked on is just going to get lost in the sea of monotonous FPS games

I do. The game is almost perfect.
By the way, are you fucking dense? Having now played it, it definitely has plenty of bugs LOL.
Almost perfect?

I don't mean to belittle the RenX team, I just think almost perfect is a bit of a stretch LOL

It's the echo chamber that C&C is well-known for. It's why most C&C projects are complete jokes. They don't get good feedback, they get "wow omfgr almost perfect" and whatnot. Look at any APB thread on their forums. Look at any Reborn thread over there, too. Then check the rest of the C&C mods that still exist. They all get this special treatment because nobody cares about C&C. The few people that actually *do* care are showered with adoration by friendzoned pencildicked geeks who are utterly amazed that anyone would ever bother to do anything for them

The mod creators never get any real feedback and plod along going LOL IMDABEST until someone comes along and says otherwise, then they gang up and the echo chamber turns the derp up to potato. What was once "omfgr wow almost perfect" is now suddenly "OFMGR EPIC WIN EPIC FOR THE WIN EPIC HARVESTER BRODUDEFRIENDGUYPALBUDDYPROSKIZ EPIC"

I'd like to see RenX succeed without going the generic FPS route, but they've already committed themselves to it and there's no going back at this point, so yay. We get another "game" that dies in a couple of weeks after people lament the awesome AAA graphics that coincidentally look exactly like every other FPS

Though I never really got involved with other C&C related projects too much, RenX has consistently gotten massive feedback from testers during every build, and generally discusses and adjusts the game accordingly.

Aircraftkiller wrote on Fri, 17 January 2014 22:35!d like to see RenX succeed without going the generic FPS route, but they've already committed themselves to it and there's no going back at this point, so yay. Many of the major differences between RenX and other Renegade-related mods is that RenX actually adds legitimate gameplay mechanics that were never attempted with Renegade mods, and that RenX isn't restricting itself by treating Renegade (or another source) as a holy text of reference. Maps are reimaged. The core gameplay is kept. Mechanics are tweaked to compensate for new mechanics. The entire design process is oriented around producing something that as many people will enjoy as possible, not what 3 random devs happen to think is best at 5AM, not just the Renegade niche, and not just the new guys. If what most people seem to prefer is a "generic FPS" which is visually and mechanically richer than any Renegade mod ever tried to be, then players will choose to play RenegadeX, and leave Renegade to the dying niche it is. Seriously. Tell me how RenegadeX is any more "generic" than Renegade.

You're got a talent for writing a lot but saying very little. Let's break down your post:

"legitimate gameplay" "isn't restricting itself by treating Renegade as a holy text of reference"
"Maps are reimagined"

Just name it Call of Duty: Renegade already. I already explained how RenX is generic. Read my posts. I'm not writing them again.

Hey ACK, are you in the beta? I think you are comparing RenX Black Dawn which was not built as a MP game and had plenty of faults. I recommend you should take part in the beta and get a feel for the updated gameplay, this way you can also legitimately complain about stuff rather than not trying it and complaining.

Fobby added EWD, so if there is anyone else who wants to give the game a try please let us know. We did ask people from renforum to apply but hardly anyone did.

People see the sprinting and the ADS (which is very limited, and only on some weapons) and they assume it's Call of Duty. People see vehicles, and they assume it's Battlefield. But that's like saying C&C Renegade was a "generic FPS game" too because it had reloading, finite ammo, snipers, a HUD...

Those who have actually played the game know that Renegade X is nothing like Call of Duty, and nothing like Battlefield. I won't even respond to that point, because everyone in the beta knows that it's simply untrue.

As for Ack's experience with Renegade X, the only experience he's had was trying to join our team in early 2012 and being turned down. That, and about 20 minutes of playing Black Dawn before his PC BSOD'd. Maybe the BSOD was the game's fault, but his computer crashing has inspired endless posts on several venues constantly poo-pooing a game he's never played properly.

2 years later, we produced a multiplayer game, and we're giving you a chance to try it out. If your PC can handle it, I don't see why not.

Quote:The most obnoxious part of RenX is that they chose the most uninspired art direction possible. Yeah you'll forgive me if I'm too busy working to bother beta testing a game I had little interest in beyond offering help at one point to build up my portfolio to find a job (~2011) in my field.

I'm not nagging about the gameplay as much as I am about the graphics, and that's always been a constant thread with me. It doesn't look like C&C. It looks like Unreal mixed with CoD mixed with Battlefield. The visual style is blah. There is *nothing* distinctive about it. If you guys like that, then hey: Have fun playing it.

has anyone been able to match westwoods ability to do their graphics in a way that's not that the graphics are detailed but it's done in a way that's... sharp, colorful... yet simple.. and you can really put your creative self into the game at mind when playing it. Most games seem to just be made to look good and have a certain type of detailed graphics that appears really good in many ways but when you actually play it your creative self can't put yourself in the game and it becomes hard to focus.. or something like that.. Im thinking the game wasn't done with a creative mind it was done with an ego-mind if you know what I mean

Posted by [Mad Ivan](#) on Sun, 19 Jan 2014 09:44:57 GMT

[View Forum Message](#) <> [Reply to Message](#)

Visually, the game does look like UT meets Battlefield meets CoD meets Renegade, but, correct me if I'm wrong, that was the point, right?

"C&C Renegade re-imagined as a modern shooter" - the original got panned for mediocre graphics and poor networking performance (lag), but critics seemed to like C&C mode.[0][1] By the looks of it (no pun intended), Totem Arts is doing quite well with the task.

Havoc 89 wrote on Sat, 18 January 2014 11:50if there is anyone else who wants to give the game a try please let us know. We did ask people from renforum to apply but hardly anyone did.

I have an interest in trying, but I don't know if I'll be able to commit to being a beta tester, but rather a "guest". The application form required an "organization", IIRC. Can I apply or should I wait for the release?

wow thanks, Fobby and Havoc 89.

I was sincerely trying to log into my old "Starbuzz" account at the Renegade-X forums since Jan 1st but could not remember my password and I no longer have the e-mail account I used to have to register there.

I was desperately trying to get on the Beta as I have a computer good enough for it and have lots of spare time these days. But I could not do it due to my account problems and your deadline was the 7th. So I gave up hope.

I know Omar007, our loyal Reneforums comm warrior and friendly fellow mutant was the first one to sign up from Reneforums as I saw your Reneforums sign up thread. I would love to join too!

Though I did not play Black Dawn due to a Vista error that did not allow me to install, I did play your previous ReneX release a few years ago with a few vehicles and chars.

I would appreciate it if you could reset my password and let me know here so I can take the next steps like make a Steam account and so on and let you know on the ReneX forums.

Thanks!

[View Forum Message](#) <> [Reply to Message](#)

here's my take in all this:

As long as the C&C Mode element shines through all the graphical additions and remakes the ReneX team has made, I think Rene X will do fine.

For example in Mesa, if I join as GDI I always work hard furiously to try to get a Med ASAP for me so I can go to the bridge to try to hit some buildings. And I would be carefully looking for how techs/engis can jump out and make quick repairs during battles from their vehicles. That's a huge part of Renegade. I am very eager to do these things in the Beta if I am allowed in. Things like Exit positions on all the vehicles, beacon runs with Apache on Walls_Fly and so many other sneaky things that made Renegade addictive for me and still here since 2007!

I am sure the CW folks have come up with lots of secret tricks already lol to exploit on the weak and poor.

I am sure the mod will be just fine and if so, then the game would be a winner.

EDIT:

You're not supposed to start hitting buildings immediately after getting your medium tank on the bridge. The most important thing is keeping bridge control, then control over the whole long side

of Mesa and then any enemy vehicles and engineers in the cave. Once you're reinforced you can start shooting buildings but you should not allow Nod to push up from the side.

It's pretty much the only thing you need to do to win the map too, which is pretty retarded. Especially considering all tanks blow balls on the long side because it's close corners so the Medium Tank excels more. The only downside is the open space on bridge which makes it easy for snipers on the short side to shoot across it and kill your Hotwires.

Yes, you got us. I admit that a game developed over a span of nearly eight years, with contributions from a few shy of one hundred artists of varying skill may not have a superior visual style to that of a blockbuster game (see Unreal Tournament, Call of Duty, Battlefield), or as coherent an art style of yet more past and present commercially available titles.

While I see you perceive an issue with the quality of the feedback that the c&c community provides to the developers of various projects, in the form of blind fanboyism and compliments, I find you consistently provide an equal counterbalance of unisightful criticism and judgement. Why then, in your infinite wisdom, do not you provide us with constructive feedback on specific issues that you feel need to be addressed instead of making vague blanketing claims such as "It doesn't look like C&C." and "The visual style is blah.".

I realize you are (or claim to be) a busy man, but your presence on these "dead" forums, and persistent postings bashing our visual style seem to suggest otherwise. If you could take a small amount of time out of your allegedly busy schedule to provide us some insight into what specifically makes our project "a forgettable game with no striking visual style", as well as what you feel we could do to remedy these issues, it would be greatly appreciated.

I don't care if it's a superior visual style. I'm not expecting to be amazed by a fan-created project (though I will admit that Black Mesa > RenX in every way, shape and form), I'm simply hoping that someone realizes that it's okay to stop copying the visual style of other games and come up with something distinctive. At the very least, copy Crisis. That game has environments that look far more realistic than anything you guys have created. Granted, they were paid to do it, but that doesn't change my point. You could've easily taken the gameplay concepts in Renegade and applied them to open-world maps with detailed terrain that didn't bring back dated level design based around Canyon Land maps. You could've pushed the boundaries and made it feel like Europe/Africa instead of Generic FPS Maps. You didn't do it. That's fine. Just don't expect me to appreciate it.

JeepRubi wrote on Sun, 19 January 2014 22:51 While I see you perceive an issue with the quality of the feedback that the c&c community provides to the developers of various projects, in the form of blind fanboyism and compliments, I find you consistently provide an equal counterbalance of un insightful criticism and judgement. Why then, in your infinite wisdom, do not you provide us with constructive feedback on specific issues that you feel need to be addressed instead of making vague blanketing claims such as "It doesn't look like C&C." and "The visual style is blah."

Since you obviously feel that my criticism is un insightful, I'm left wondering why you care enough to post on this dead forum about it. I've already made my intentions clear many times. I post here to troll. That's about all I do on these forums. Nothing I say that's severely negative should be taken seriously unless you enjoy being riled up, in which case, hey, go for it. It's more entertaining that way. Regardless, I honestly don't feel any C&C vibes from RenX for the reasons I've already stated.

JeepRubi wrote on Sun, 19 January 2014 22:51 I realize you are (or claim to be) a busy man, but your presence on these "dead" forums, and persistent postings bashing our visual style seem to suggest otherwise. If you could take a small amount of time out of your allegedly busy schedule to provide us some insight into what specifically makes our project "a forgettable game with no

striking visual style", as well as what you feel we could do to remedy these issues, it would be greatly appreciated.

It's not hard to post. Let's dispense with that idea right now. Posting on this forum takes less than 10 minutes of my time each day, if I post on it at all. If you actually want my opinions, then I could certainly revisit my attitude toward your team and its project. After my talk with Fobby a few years ago, I gave up any interest in it beyond the occasional snarky comment. I don't like design-by-committee nor do I like seeing people "reimagine" something and make it look worse than I feel it could be.

The problem with you asking for my legitimate criticism is that nothing I say is going to be changed. You're not going to scrap your AAA-copying art direction in favor of bucking trends and making open-world environments with a focus on creating European vistas that don't have massive amounts of C&C3-inspired massive Tiberium crystals popping out everywhere. You're not going to change up your buildings and units to remove excessive, unnecessary detail because you've already put the work into it. You're not going to change the direction you've taken for years, so why bother yourself with what I'm saying? If it fails, it fails. It won't be much different than anything else in C&C. If it works out in the end, then be sure to find me and tell me I was wrong. I probably won't care, but it'll make you feel better.

Those C&C3 crystals make me cringe hard whenever I see them. The Tiberium fields on the Walls 'reimagination' have them and I wonder how the fuck a Harvester is supposed to harvest them.

I've not seen the ones in RenX, but as a general point... I don't believe Tiberium is required to grow in Harvester friendly shapes... it's not as if its a manmade resource.

This:

doesn't turn into this:

Toggle Spoiler

For at least 50 years. If you don't like the original Tiberium and the methods by which it grows according to C&C canon, that's fine. If you want to make a C&C game based on C&C95 (if you argue that it's based on Renegade, bear in mind that Renegade was intended to be C&C95 in FP, not what it is now), then it needs to look at least somewhat like those images. There's plenty of room for artistic license with those designs. Scrapping it completely in favor of what we see with RenX just irks me. It reeks of "I don't like the source material I'm building from, so I'm just going to do purple donkeys instead. It's more artistic that way!"

If Black Mesa: Source changed Half Life into some weird-ass Unreal clone with graphics modeled on Doom, there'd be outrage. The amount of people who would want to play it would be completely overshadowed by the people who think it completely shits on a great game's legacy.

To be fair. I agree with Aircraftkiller in regards to the crystals; they reek of C&C3.

Raveshaw also has a C&C3 Nod logo on his cap that I dislike.

I like my canon to be right!

Jaspah wrote on Wed, 27 November 2013 19:50The game looks incredible.

I don't know where all the hate is stemming from. The original game definitely wasn't very complicated. I don't see why the original gameplay couldn't possibly be replicated and improved in RenegadeX.

It's a chance to breath new life into Renegade, and let's face it, it desperately needs it at this point.

But, hey, by all means keep sitting around circlejerking a game from 2002.

Perfectly stated. The game's looking really neat, and I'm excited to play it on the 26th.

I agree, the game does look great and i'm really looking forward to playing it. I'm hoping it will revitalise the Renegade community.

However, i am disappointed they've gone with c&c 3 style tiberium, and not classic tiberian dawn style tiberum. If it was based on C&C, it should have the crystal with pod style tiberium...and blossom trees.

I totally agree that previous releases where "meh" at best, but more like "meeeeeeeeehhhhhh". However, it has improved a lot, now it's actually fun to play instead of a drag.

I honestly believe that the future of Command and Conquer Renegade relies on Renegade X. The original game is just not as good as CounterStrike 1.6 is for example. It is coded really bad and feels like it has never been tested properly. Recently just felt like a quick fix for EA.

Subject: Re: RenegadeX
Posted by [liquidv2](#) on Tue, 25 Feb 2014 17:53:30 GMT
[View Forum Message](#) <> [Reply to Message](#)

i don't
people still play Starcraft to this day
Starcraft II is its own game - it's more of a modern take on the original, but it isn't the original and people will still play that

Renegade X is a more modern take of classic Renegade, but that doesn't mean Renegade isn't still worth playing

31,000 downloads? Somehow I'm skeptical of that figure given the number of people actually playing the game... seems more likely their download server was overwhelmed or is miscounting when people resume interrupted downloads or use multiple connections via download managers.

Still, even taking that into consideration it looks like a pretty impressive download count, well done to the RenX team.
