Think about it.

I agree that our definitions are about the same. So are you trying to say this guy has a chronic illness or disabled? No, you're trying to insult his intelligence. But being an invalid and having some sort of diminished mental capacity are not mutually exclusive. It is very possible for an invalid to be mentally normal, like Christopher Reeves or even extremely intelligent, like Steven Hawkins.

There's not much to think about if you know what the word means.

Invalid does not mean someone who suffers from chronic mental illness. Its means someone who physical disabled and can not take care of themselves. Those who are not physically disabled are not, by definition, an invalid.

Try again.

Congratulations Captain Crackshot! You've missed out on another one of life's little points. The <http://www.dictionary.com> defination of invalid is as follows:

n. One who is incapacitated by a chronic illness or disability

Now, instead of living in your one dimensional world where only literal reading exists, you can extrapolate that ILLNESS can also mean a mental illness. Or, oh my, disability? Yup, I believe that qualifies for a mental disability.

Now, instead of wondering what a valid insult to a racist bigot means, you can move on with your lives, hopefully.

Now, instead of wondering what a valid insult to a racist bigot means, you can move on with your lives, hopefully.

believe the online dictionaries, or us, just call a hospital and ask them for yourself.

I don't condone his remarks about Canada, but what he said does, not by any stretch of the imagination, make him an invalid. Or racist for that matter. The only word that you've used that makes somewhat any sense at all would be bigot.

Here you are, champ. Several sites, all defining invalid. I see none of which which support your own claim.

<http://encarta.msn.com/encnet/features/dictionary/DictionaryResults.aspx?refid=1861622187>

Here, you have many definations, not saying "physical" in any of which. Of course, it can be interpreted as such, but then again, so can mental.

<http://dictionary.reference.com/search?q=invalids>

Hmm... Looks like the same situation here aswell!

<http://www.bartleby.com/61/26/I0212600.html>

Well, looks like a shine of hope for you yet! But wait, oh dear, looks like that is intended for a transitive verb. Not the noun that I had used in reference to him.

<http://www.askoxford.com/dictionary/invalid1>

Hmm, yet another definition that doesn't add the word "physical" into its definition.

Well, it turns out that you are about as "correct" as I am. It neither states mental, or physical in the same context of which I used it. I guess that means that it is open to interpretation? Mental of physical? Both?

Hmm...

Subject: AirForce2003 Aircraftkiller NO RELATION

[View Forum Message](#) <> [Reply to Message](#)

I would also like to point out, that as an insult, it does not need to be in the scientifically correct context, (although that is what I'm arguing, Raven may not actually be an invalid.)

It's like if I call someone a "Pile of shit". They aren't necessarily a "pile of shit", but it is an insult, so the context is built into the sentence, just like how when I call Raven an invalid. He may not be an invalid, per se, but he is an idiot. Which is correct, just rephrased in a slang term which is offensive.

[View Forum Message](#) <> [Reply to Message](#)

Now you're trying to implicate something that does not exist. Remember, when I am using a noun to refer to him, that is not a transitive verb, and is not therefore a "physical illness or disability".

This is what you seem to be implying in every single one of your posts:
An invalid cannot be a mental illness or disability.

Now, if that's incorrect, tell me, because I've obviously not been able to understand what it actually is that you're trying to argue.
However, if you can proof to me that in every possible way, that an "invalid" (Key point here! ****NOUN****) cannot be a mental disability or illness, then I can agree with you. You have still, at no point given to me proof that is true.
