I forgot to release these after I finished making them. they arent set up for barrel animation because it was a massive pain in the ass to get right and I wanted to move on to other things.

with the settings below the tank is faster than a stank but slower than an APC, the download comes with the sounds i use as well as PT icons for both tanks.

since i have a skin on my med tank, and it takes the med tank's skin somehow, my gat tank is also skinned in a similar fashion

He's using existing files that are in renegade and not custom ones, so it makes sense that it does that lol. I think the Nod one uses the Nod APC

yeah, it makes sense to me - just thought it looked neat

my thought was the skin i'm using looks ideal and great on any desert map, and i was supporting him adding it to his Temple map as a preset

That is some impressive stuff unit, and people could just add the barrel animation themselves I think if they want that.

@ liquidV2: That's a cool skin do you have a link for it? A bit off topic, sorry...

Works pretty good for killing bears

I just have two suggestions:

1. Add head light and tail light dazzles, they go a long way to making it look better when a map supports dazzles.
2. TrackUscaleFactor is actually closer to 35 than 25.

That is all.

the med skin i'm using was made by anant
it looks like the C&C 3 ones that dude made though
i'll let him know and see if he'll upload it somewhere

Gat tanks vs. bears is just unfair

It really isn't, they've managed to kill the only one anyone has bought so far (probably need to
rebalance pricing).
