I was thinking of releasing this under a different map name and include all the source code for the scripts I made for this mod.

This, of course, is only if there is any interest in it as a lot of modifications would need to be done by me. I could also include a client side version of the scripts for lan lovers

I think it is a pretty cool mod that is fun ta play every once in a while  and I would kinda hate to see it disappear especially since Mauler and I did quite a lot of work on it...

Since your departure, I'm guessing it's not on MPF or what...?

Roszek is releasing the map mix and source code for all the custom things we worked on... since it is no longer on MPF, he is giving it away freely and so others can play/host and not have it disappear for ever!
