So, a while back I bought a panther and a cougar with the desire to animate them and add them to renegade; however, after several attempts to make a walk animation I have failed to get it to look acceptable. I have finally decided to reach out and see if anyone would be willing to give it a try, basically I need a walk animation and a run animation (although walk is the main one, runs are usually pretty easy to pull off). With a base walk and run I can manipulate them to do all the other movements needed, if anyone is willing to give it a shot either post in the thread or send me an IM.
