Subject: Installing renegade with no CD ( I have the cd key)

Couldn't seem to find anything by searching so will make a new topic.

I have my first decade CD, but my new Laptop has no CD drive. Is there a way to install Renegade via a download using my CD key? I don't want to download anything that may be malicious either.

Thanks,

Rob

<http://rencorner.com/index.php?/topic/10949-i-havent-been-in-the-loop-for-a-while/>

Look for rackz's post. Click the first link. It's an ISO file and it will download the game in its entirety. Look for the setup file. I did this two weeks ago because something went wrong with either my disk drive or my TFD CD.

Ok thanks I downloaded the ISO, but when I install it I get a step file error at 99% asking me to insert the cd. Any help?

Thanks

I'm not sure what could be the problem. It shouldn't have to do with your lack of a CD drive. Are you running as admin? What steps did you complete?

When I did this, the ISO downloaded and I found the setup file in the newly downloaded game folder, which I found under the C drive. You may have to make a new account on RenCorner if we can't get to the bottom of this here.

---

What are your laptop's specs?

That was one thing I thought of but thought it wouldn't work for some reason. I don't have any practice mounting CDs either. To play I just needed to click the ISO and it downloaded easily.

<http://renegade.dmehosting.com/CD's/>

apparently this link still works, I used to use the GameCD.iso and mount it with Virtual CloneDrive and install Renegade that way every time. don't know if I ever tried it on Windows 10 though.

Ehh, you have a bad attitude most of the time and are very blunt, but I can relate to your character pretty well. I bet you are just like that in real life, aren't you?

It still works... better if you update it.
