Subject: the update program failed to request the latest version from the server

Today I bought a renegade in the Ea App. I downloaded Renegade, Installed the Tiberian Technologies patch version 4.8.3 and the W3d Hub launcher. The first time I managed to log into renegade, I played on the server, but when I tried to log into renegade the second time, this error appeared. What to do? Wi-Fi is fine. Maybe I need to set up a firewall somehow, but I do not know how to set it up or what to change there.

It might just be a network blip; you can continue into the game.
If it keeps happening, post a follow-up please.

The error still appears, I even reinstalled renegade and the TT patch. But I can play multiplayer by clicking the Continue button in the error window. But I want to play on servers using W3d Hub, but the error "Failed to connect to backend" pops up. I understand that the W3d hub forum does not apply to you, but they did not help me there. Maybe you can help?

I assume it's all happy once more, the w3dhub servers were down for a couple days.
