Posting some info about your server would be helpful.
Like how many players is it? WOL or GSA? Sniping, AoW or C&R?

Okay here is the map rotation and other information:

MapName00=C&C_Beach.mix

MapName01=C&C_Glacier_Flying.mix

MapName02=C&C_City_Flying.mix

MapName03=C&C_Walls_Flying.mix

MapName04=C&C_Hourglass.mix

MapName05=C&C_Volcano.mix

MapName06=C&C_Under.mix

MapName07=C&C_Canyon.mix

MapName08=C&C_Mesa.mix

MapName09=C&C_Islands.mix

MapName10=C&C_Complex.mix

So only 2 unoffical maps, but I am not sure of what else to use...

The server name is: Coolmat's Fun Times

It is on: WOL, considering Gamespy instead...

Starting Credits is: 100000

Game length: 45 Min.

Players: 6 Players, unless I can do more on a cable connection.

you might want to bump the starting credits down. i'm pretty sure most people only like a max of 200.

...Glacier is an official map.
Beach isn't.
so there's only one unofficial map.

C&C_Deth_Islands.mix (made by clan member)
C&C_River_Canyon.mix
C&C_Siege.mix
C&C_HandDM.mix
C&C_Conquest_Island.mix
C&C_Secretbase.mix
C&C_Hangmans_Canyon.mix

those are sum really good maps people like

and i would advise you use C&C_Deth_Islands as a replacement for
C&C_Islands as it stops n00bs form B2B(Base 2 Base) camping

Also what more advanced Renegade server hosting software is there besides the All Seeing Eye and the Renegade Free FDS?

Thanks.

My server is on USA, and I am not sure how I would get it on Euro, because all I do is boot up the console and it goes right into the WOL servers.

I am thinking of changing my server to an infantry only server, possibly only sinpers. With one exception: beacons, but no C4 is allowed!

Sounds good?

A sniper server sounds good, since 6 players really isnt enough for a good AoW game.

all it says is: [server]
Do I edit that and say something like server=Pacific and European?
How do I edit it so the server is more than one section, like Pacific and Euro?

Well I have taken my server down temporarily. The reason is I can't get Blaze Regulator to work correctly. Blazer? I set it up and when I try to type in server-side commands into BR it doesn't do anything. Also in game shouldn't I be able to type commands like !next, !rules, etc? Or are those commands for an irc based hosted FDS? Thanks.

Wow, you sure like to spam, but the RFDS is all we have. If you don't have BR.NET already go download it at <http://renevo.com>, set up and IRC channel, etc. you'll need the .NET Framework you can download that from <http://microsoft.com>

Sorry about the spam. I wanted my post to stay towards the top. Thanks for the help. My server is now: Coolmant's C&C Beach Server. Only plays C&C Beach. Let me know what you think. I run the server as much as I can, but I am not home until 7PM PST and I can't always run the FDS. Enjoy!
