Im sorry if I have been a dick (wanker for the brits here) lately, or have been acting like a n00b...

But I am going through some hard times lately and don't know what i'm doing.

I recently had to put my dog to sleep, she was like my best freind or a sister. So for the past week I have been incredibly sad and angry.

Can you blame me?

I'm not looking for pity, I am going to get back to my old helpfull and creative self but I havent been making it easy for me.

Well here goes nothing....

PsycoArmyYou use to be helpful and creative?

I used to be, not I use.... whatever...

I am sure a few folks thought I was damn helpfull

But I kind of hate that I started this thread. I don't know why I bother.

You helped me a bit when i first came to these forums, although you described my first map as

Quote:

this map is pretty cool. But is still lame for one reason, its just a WS building turned into a MP map by a fan modder

yes i found the original post

aside: you also said this about it..... what were you on about???

Quote:major flaw in map! whenever you try to set it on fire, the monitor melts!

I still apreciated the help

Hehe, the first quotwe I thought tha map was pretty good. but you just ressurected a WS design, but I know it took some skill to get it finished the way you did.

The second quote, I was just fooling around... I was saying if I try to light it on fire, the fire only damadges my monitor

I hold lighter up to the monitor in attempts to burn your map, but only my monitor is damaged. The bug is that I am crazy.
