I want to get into modding Renegade and i installed Gmax and the Renegade tools and I was wondering if someone could please tell me what the Commando Level Editor is used for and RenX and the W3d veiwer.

Thanks Alot,
Aaron

Renx is the gamepack for Gmax which is a 3d modeling program.

W3d viewer, views .w3d files.

Commando is a level editor (maps)/mod package editor/etc. program.
