Download Speed?

Upload Speed?

Cable/DSL/Dial-up/Other?

Use <http://www.dslreports.com/stest>

I'm currently on cable but next week I have to switch over to DSL (cable's boosting their price to \$58/month from \$43/month, DSL is \$35/month), and I'm afraid of getting much lower speeds (like, 384 kbps download speed)...

Download speed: 1788 kbps

Upload speed: 216 kbps

I've got DSL. I'm under some special calling plan with Verizon where I get a discount on the DSL and some local and long distance calling plan. I dunno, I don't read the fine lines. All I know is that DSL and my calling plan all together cost me \$65 a month.

I have DSL. Pay \$29.99 a month.

Download Speed: 1537kbps

Upload Speed: 412kbps

Changes may vary.

^

Small fine print. :thumbsup: :thumbsup:

BellSouth DSL

Get around 1200/220. 50 bucks a month.

It's really crappy because they built out their own backbone in the southeast recently. Before, I got a pretty straight shot to the UUNet backbone, but now it appears as though BS has stopped using UUNet altogether. Its made my pings skyrocket about 50-100 depending on which coast the server is on.

Tried to get Cyberconic DSL, they offer 1500/768 for 50 bucks a month, but don't offer it in SC.

C4minerDownload Speed?  
Upload Speed?  
Cable/DSL/Dial-up/Other?

Use <http://www.dslreports.com/stest>

I'm currently on cable but next week I have to switch over to DSL (cable's boosting their price to \$58/month from \$43/month, DSL is \$35/month), and I'm afraid of getting much lower speeds (like, 384 kbps download speed)...

Download speed: 1788 kbps  
Upload speed: 216 kbps

If you are one of the people with AT&T or Comcast, see if you can get Earthlink cable. Earthlink is well rated at dslreports and is supposed to have 2.0MBS download speeds! Anyway, before you switch, see if other cable isps are available in your area first. Just a suggestion.

ConmanFuck you to u ass holes

This is going to get old real quick... so maybe you might want to wrap it up and try something like real conversation or don't bother wasting your time posting, because we don't want to see every thread you come in with a response something like this. Then again, this behavior would definately make it easier to get you banned... so keep it up... let's see how it goes.

What city in Canada do you live in? My adsl is same price as sympatico but 3x download and 10x upload  
Well I live in Toronto. But I doubt my parents would be very content with having to change their ISP just for me. Maybe when I build my own comp I will take a look. What is their site?  
<http://www.skynet.ca> i think

HomeycoolmantTake a look at this!

Your download speed : 1731030 bps, or 1731 kbps.  
A 211.3 KB/sec transfer rate.  
Your upload speed : 227001 bps, or 227 kbps.

Seems like broadband .. above the 1mbit barrier!

Question, why can't this connection hold a 6 player server. I have this:

P4 1.7GHZ

512MB RDRAM

Geforce 4 MX 440

and a six player server doesn't work. Why not?

Nur 7 can, default is 10

What is Nur 7?

Fiber-optic 75720/30100

I wish...

Cable 3200/800

Crimsonnur = Net Update Rate

Thanks. So what is the max amount of players I can run with the setup I have, and what Nur do I use to achieve that?

coolmantCrimsonnur = Net Update Rate

Thanks. So what is the max amount of players I can run with the setup I have, and what Nur do I use to achieve that?

You can host a 3v3 dedicated at nur 6 with no ping lag. Unded you "might" be able to at nur 5 but would warp and such
