I set a fire animation on a vehicle, but the animation loops forever when the weapon is fired just once. I was wondering if anyone knows of a way to disable this. Thanks.

I haven't played with vehicle animation (gotta do that sometime) -

but - wouldn't the bone turning on and off work?

If you tie the emitter bones to the muzzle bone - and it is visible - that should cause the emitters to start?

Once i finish this map pack - i will try my hand and vehicle animation --- maybe something will hit me in the head?
