Hi, k im not sure if crimmy will approve of this, so if its not well looked upon, just close this and accept my apologies.

Ok i host these badboy forums, and apart from these, my server isnt well used, hardly - about 12 sites, 4 are personnel and the rest our friends.

So i thought, since im involved in many aspects of the community, helping run gameservers, running/setting up my own cnc site, <http://www.cncdownloads.com> and hosting the forums, for free i may add

Id offer my services, offer a good deal to the cnc community so here it is,

50gigs of bandwidth  
1 gig of HDD  
50 Subdomains/ftp to them  
Unlimited POP-3  
and 3 mysql databases

for a measly \$25/a month

Seems a little cheap i hear you say?!

Well yea it is, but my server is hardly used and needs, neigh it yearns for use!!

The server is a AMD 1800, 512 DDR Ram, and a 80 GIG drive

And the control panal is Cpanel 6.2

If you are intersted either email me, [andy@ambersea.net](mailto:andy@ambersea.net) or PM me on here

If Crimmy dont like it, sorry :oops:

I certainly don't disapprove. This server runs very well and of course you can plug your shit when you're kindly hosting this for free.
