Sounds like you guys have a real 'friendship' huh?
Quote:ALLOW [<Nickname>|<Id>] - Remove user channel ban from this server (WOL mode only).
BAN [<Nickname>|<Id>] - Permanently ban a user from this server(GameSpy & WOL mode only).
Or remove his Westwood Online nickname from the 'banlist.txt' in your FDS directory.

Or if you're using BR, enter a game and type "!allow playername".

Go to your Renegade folder and look for a .txt file called wolbanlist. look for his name and remove it if allow does not work. It should end up like this: madhawk72:#.#.#.#

I found these commands don't work properly 90% of the time. If the person is on your FDS ban list, the best thing to do is delete the name manually. Then restart the server.
