I'm curious what a lot of people think, and would like to get your opinion. Vote, then hopefully we can take the results and discuss them at the end of the month.

It'll last as long as people want to play the game. Currently, I see myself playing this time next year and beyond.

When RenAlert and Reborn come out in finished formats it will be revived. However, I will probably spend more time playing HaloPC then i do Renegade once it comes out.

Sheesh, this summer the two side of me will be battling for time: RTS or FPS?

Homeworld2 or HaloPC?

tough choice.

I think about 8-10 months. But for some reason renegade wont start on my computer anymore. I had to uninstall it because WOL was messed up and now I can't reinstall it because the computer freezes when I click install. It can't be my computer because nothing's wrong with it. So I think it's my cd.

I reckon REN will never die , its one of those games that ull have a break from every few months then return with a vengeance!

Like how i did , had the game since it came out and played it non stop for months !!, then got another game that shall remain nameless, played that for a month, then returned to REN !

AWsome game.....it shall never die !

I don't think Renegade will ever die.

If EA decides to stop supporting it, players can still find games through GameSpy.
The number of players might decline significantly, but servers running it will still exist.

I don't think that it will ever die . It is the best game that westwood ever made (I have not played generals yet so it myght change). Did half life ever die? NO. and how old is it? About 5 or 6 years (I guess that the only reason that it did not die was that Counter strike was introduced).

Westwood didn't make Generals... ea did... I don't remember seeing Westwood's name on it anywhere, as far as I remember... could be wrong, didn't play it all that much.

A little while.

Ren will survive for 6 months, maybe even a year. But the level of play is starting to become laughable. Its hard to play a mod map and have any one join at all. The 'same old' westwood maps have become boring.

Renalert may yet save the day, but i doubt it. If it is not well advertised and no one dls/hosts it it will be for naught.

I wonder how the dead six expansion is coming?

In actual fact it is us, the Renegade community who decide how much longer it will last. If we all quit today it will surley die fast. If we carry on supporting it then it will have a better change of lasting a while longer. Electronic Arts have nothing to do with the life of the game really except Westwood Online. The community itself are the ones who have kept it alive. Without the community we have here it would be gone by now.

Stop posting stuff like this and it will survive and things like.....

Planetside!!!! OMFG it's amasing!!! (even if it is true)

WHAT ALL SERVER HOSTS NEED TO DO IS PUT ON FAN MADE MAPS SO ANYONE WHO PLAYS HAS TO DOWNLOAD THEM AND BE PART OF THE COMMUNITY!! (THIS CAN HAVE BAD CONSIQUENCES BUT OVERALL WILL BE GOOD)

Not just the predictable Glacier but Sand, Gob,i Land, Seige. Etc (i'm sure there is more) . some CTF maps!! FFS give em something new hosts come on!! the modders have done the work!! now

suport them!!

There are many good servers but the only ones that seem to want to help the community are the Moonlightshakers and the Pits..... HOSTS GET YOUR ACT TOGETHER!

:rolleyes: :rockedover: :bigups: :bomb:

If you have any maps that you want as a CTF map but can't be bothered to learn or do then I can do it. Also the same goes for a Team Deathmatch map, where you win by killing the enemy team XXX amount of times. They take around 10 minutes to setup on a map if you know how to use them. It's really not that hard to do if you know how to work with scripts.

Gamespy is crap yes. That doesn't mean to say that Gamespy mode Renegade servers are crap. My clans server is a 30 player server ans we are always full in the afternoon and night. There is a lot of teamwork normally when the rest of the people in my clan play, especially when there are clan members on the enemy team, it gives us chance to imporve our defensive skills, normally there is not defending an APC rush from our clan.

Gamespy is standard installed software for Renegade. It comes up as an option when you try to log on to WOL.

Renegade will survive as long as we play and support mods and fan maps. Stop the support and you might as well pull the plug.

It will survive as long as EA has nothing else to offer the team based/FPS online crowd. Counterstrike looks like fun but it's no Ren.
