I don't post a lot of stuff here, but I thought I'd give Dante more recognition. Besides he doesn't need it really. Here is a screenshot!

Thanks Dante! I also got those missiles shootable...

I haven't seen GI Joe in a long time but i think that vehicle is the Sky Hawk.

And i think he is just sitting on top of the ground firing the laser

Yes, Forsaken is right! It's the Skyhawk. For those of you who don't know or remember the GI Joe stuff... it's a VTOL vehicle for 1 person.

Yep, this will be a full fledged mod. New characters, vehicles, buildings, levels, and \*possibly\* single player stuff (with a whole new GI Joe story!)

And all you people thought Renegade was going to die. Ok so maybe it will but it will definately be used again in the future!

Yes, but you can just change the beam color in Commando to get what you want.

You mean this one?

It's called the "Trouble Bubble" or Flightpod.
