Why are you even showing this stuff? None of it is skinned, none of it is close to completion, none of it is even worth anyone's time to download...

Why don't you stop working on loads of modifications, then just make one that's actually worth people's attention?

I like seeing his work. So shut the hell up Ack. He's just showing us what he is doing. If you don't like it, keep your mouth shut. He's not looking for praises but he's not looking for flames either. He just wants some CONSTRUCTIVE CRITICISM! If you think they looks bad, or need work, you can say so, but tell him how to make them better. Not just :

"None of it is skinned, none of it is close to completion, none of it is even worth anyone's time to download... "

Tell him how to make it better. Don't be such an ass.

PsycoArmy, I think that they look great. Keep up the good work. The alien model needs a little work though, it's too box. Try rounding the edges. All around though, the models look great.

I don't need to tell him how to do anything. There's about 500 tutorials out there that explain how to work with Max and how to work with Photoshop.

I'm not here to bottle-feed you idiots. I'm here to say what I feel, do what I want, and speak my mind. If you don't like it, then shut the fuck up like you suggested and get the hell out of the thread... You're a hypocrite. I can't stand people like you.

That first tank is alright except for the "wheels" and treads. Why is there an extra segment running down the length of those treads? The only thing it's doing is taking up polygons.

What's with that weapons factory? There are alot of polygons on there that aren't needed.

The barracks is just a plain box with a hole in the end, it needs ALOT more detail than that.

The only thing I have to say about that "alien" model is that it just sucks, it really does. It's not too boxy at all, it actually has WAY TOO MUCH polygons. Most of those areas of polygons can be reduced from around 20-30 polygons to like 5 with little difference.

This rocket tank thing is also poorly made.

There's this little modifier called "Optomize", you should really try it sometime. (And a few tutorials.)

BladewarriorHeres a poll, who hates ACK's guts, and thinks hes a fucking retard?:

Me!

I do: 1

No I don't: 0

Child, grow up and get a life. Let us know when you get past puberty.

AircraftkillerI think commenting about people having weblogs is a waste of time... Don't you?

"Weblogs" are worth time. Though mine is a live journal. It's a great place to let off steame and just write about anything.

I 'kinda' like the tank. The warfactory is ok. I don't like the barracks. I hate that alien. Try to improve on them, give them some details, and texture them, then re-post.

You fudgin retard, u give so much shit to this comunity ur owrds mean nothing at all.

PsycoArmy

Correction; you give shit to this community... If you would work to make your models half-way decent, then come back and claim to be high and mighty, you'd be better off.

Then again, you don't do that... I don't care if you try or not. Try on your own. Produce results, or don't fucking post anything. I'm sick of garbage modifications being posted by little kids with no initiative.

You already had like five modifications going before this. You never finished a \*single one of them.\*

Finish what you start or get the fuck out.

Your right i am a little kid. But not a a little kid that wants to outdo any1. am here to have fun, play some games, make models form my own designs by trying to keep the models poly within the limit.

I am not a adult (in my country over 18 is adult) acting like a child, i am a child, you can not change the way i act or model with your words. And i have gone thourgh my life with people like you who like nothing but theirselves. I m sick and tired of your peoples attitude.

So Please stay out of my way because this is the last time i am going to even read ur post.

I have to agree with Psychoarmy on this one, why should it bother you ack if he makes crap models?

If there so crap why do you even need to comment on this, is it because you feel the need to slate everyone to stop them becoming as good as you at mapping/modelling. You we be far far more respected if you learned to help people and stop insulting them. If you want to get a job in a company modelling and mapping which i am pretty sure if your target in life.. no one is going to take you on cause you act like such a jerk you now have a reputation for ripping into anyones creativity and that is going to stay with you for a long time unless you change your name and break every tie with this community.

I am not saying this as a friend or as a enemy i am stateing this as a fellow member of a community which you are destroying with your negative influence to every shread of creativity. I am sure this post wont change you, i am sure you will go through life being so narrow minded that you continue to put other people down for being creative. I no longer want to witness the endless shit that goes on in this forum i would recomend everyone who wants a decent community where people wont flame you but will try to help you out if you are having problems to go to Planetside i see 100th of the flaming over there thaN i do here and that community is 10 times the size of this one.

Soon enough when ACK has scared everyone away from the renegade community besides the people that dont visit the forums and therefore dont play his maps he wont have anyone to flame besides crimson, Blazer and maybe Dante who i think are hero's for sustaining this community for this ammount of time. Over the past few months i have seen many friends leave this community i am afraid i am very close to the desision too, and no ack i dont give a shit if you think i have done nothing for the community and i wont be missed because if this continues there will be no one left to play your maps THEN YOU WILL GIVE A SHIT.

- Snipefrag

PS: ACK you may not even realise it but you are destroying the community that you love for you own means..... Fame..... and being hated.

And all the people i have promised to make maps for dont worry i will be true to my word after i have finished my A level Exams (a few weeks).

Mapper, skinner and drop script coder

Modders should be encouraged to make modifications for Renegade and not be put off by members of the community. Remember that everyone here is equal, some members are more experienced in certain areas of modding and should offer they knowlege to others willing to make modifications for renegade. What this community does not need is memebbers who put other peoples work down, even if it is at a low standard. We should be offering support to these people so they can improve.

Although myself I have not released anything in terms of maps or modifications i have learn a great deal about modding for Renegade. I pass my knowledge on to other people through these forums and also my site. As fellow members of this communy have said before, only support can keep this community going.
