Guys I know it sounds stupid, but I decided to make my own map.

But what I found out was that making maps isnt easy at all, all has to do with a program called renex, or 3dstudiomax,

but anyways I need some tutorials from you guys "if possible", please help me make my map and you will see how good it is, i will upload a sketch later on...

And one more thing, I checked every tutorial for making a map and whatever, but they are not good enough for a n00b like me, I know something about java scripts, but I don't even know if thats gonna help me in making maps...

SO GUYS PLEASE HELP ME MAKE MY MAP, THAKS TO ALL OF YOU OUT THERE!
