Ya, I could, and did, but they don't fly around for some reason, Let me put a script, on it, and see if it works, if it does, I will put it on my site. I will be updateing my site again, about 2:00 P.M. If nothing comes up.

You can use PDS_Test_Follow waypath to make the Orca follow a looping waypath. If you attach M00_Base_Defence to it it should fire when it sees an enemy. Other than that For ground vehicles try attaching JFW_Hunt_Blow_Up this will make the vehilce hunt down the enemy when it sees them and blows up when they get near them (like a suicide truck) and there also is the similar script called JFW_Hunt_Attack, which makes them attach the enemy when in sight. Just experiment with them, they can be very good.

I don't know what the commanche is called, but I haven't made the otheres yet, but I do know that the mammoth tank, medium tank, and MRLS bots will work, I will make an Orca one also, I haven't had time yet, because my cousins have benn here all day, and I was working on my site a bit.

speaking of commanche, can you substitute it for the apache to give nod more of a fighting chance when facing the orca? Just something ive been wanting to see since the air maps came out...
