How do I connect to my BR.net server. It seems to be working, but I cannot seem to connect to the irc server. Please help me, thank you.

RTFM = read the fucking manual

BR .Net directory, br.chm

Well I figured it out, but I didn't find the "fucking manual," and for a program creator you could be a shit load more helpful. I went to your irc channel and no one would help there either, of course it was 12 AM last night...

---

br .net directory/br.chm, topic = irc bot

its in there, br .net is NOT an IRC server, you have to supply that.
