I doubt many of you will remember when I released the original C-130 Drop Editor, it was awhile ago...But anyhow, I've made a very large slew of changes to it such as a preset/script viewer, and attach function.

Even if you know how to mod the drop file manually, you can still get some use out of it, it makes things a lot faster.

But on with the links, I'll let them speak for themselves.

Download:
http://maelstrom.hypermart.net/op_c130de.shtml
Size: 75.1KB

Screenshots:

Yes i can remember a clan game that we started with 0 credits and the other clan started to run
around with beacons and the mobius gun from the start. :rolleyes:

Carbons V3 Mod

This is the best mod ive done so far much better than the stealth tanks and gun emplacement mod that i made. This new improved and more advanced mod includes vehicles being dropped onto the airstrip by a A10 Bomber. Moddified vehicles include Flying Flame Tank, Fast Mammoth Tank, Transport hovercraft, Drivable harvester and turret, oberlisk helicopter, bots and much

---

more. NOTE: Only the host needs this mod other players on the sever dont this is simply because its a script based mod. You can download it here Carbons V3 Mod

Have Fun Let me know what you think and remember you seen it here first

grrr u sold me out *crys

Carbon's V3 mod contains several mods stolen ver batim from my website, http://c130hq.cjb.net . This includes Apache Bot, a mod which I wrote and had copywritten several months before Carbon put together this "v3 mod package."

To make matters worse, Carbon is attempting to make money with his mods, by putting ads and popups, while I give away my mods for free, with no ads, so that others can enjoy renegade in new ways. This terrible injustice must be stopped!

In Carbons V3 Mod there are 43 drop files, your saying that i stole 3 of them.
The 3 that HTMLGOD is going on about are :

The Drivable Harvester = Yours didnt work it crashed the game so i re-wrote the script and made
it work and stuck it in my mod.

The Oberlisk Apache = I done this Through using your tutorial why make tutorials on how to do
your mods if you know that people are going to make them for themselves.
you can view this here http://animefreeway.knkonline.net/modsite/tutorialhellchopper.shtml

The Direct Bot Drop = This is done the same way as the oberlisk apache only it drops bots instead
of oberlisk beams there a basic bot tutorial which i combimed with the oberlisk apache and made
my Apache bots. you can view the basic bot tutorial here
http://animefreeway.knkonline.net/modsite/tutorialbot.shtml

As for the line that says ====DO NOT MODIFY=== i put that in there becuase in the past 2 version of my mod people who had downloaded it had been messing with the scripts then emailing me saying that its not working so i put this in so to try and provent this.

If i knew my mod would cause so much trouble i would of never of made it.
