One way is to use cnc_c130drop scripts to create AI bots. This is not very complicated, many
websites have them. One of the best websites with bots and tutorials on how to make scripts is
http://www.c130hq.cjb.net/ HTMLGOD's tutorials are very good, or just download some of his
mods.

The Easiest way would be to download Taximes cnc_c130 drop editor, give it a filepath
c/westwood/renegade is default for most comps. Then hit the infatntry tab and select either GDI or
Nod, but every bot no matter saide is dropped off at the airtrip, then click drop, buy a vehicle and
the bots will appear on the strip. This is the only way i know of doing AI bots.

On the old forums, this would have been the express train to TOS-ville.
